everseen

We're looking for a
Technical Graduate for Customer Projects

About us:

The world's leading retailers trust and rely on Everseen's Visual AI™ solutions to improve their bottom line by minimizing shrink, streamlining operations via hyper automation, and delivering a better customer experience.

Position mission:

This role is to contribute to Everseen's customer facing tech team whose mission is to enhance customer satisfaction through efficient deployment, support and enhanced client's understanding of our AI products.

We are an agile team of very strong engineers, researchers, and project managers, with a "move-fast" attitude, passion for creating new things the right way, for solving tough problems and delighting our customers. We encourage innovation, proactivity, autonomy, collaboration.

Main responsibilities:

- Support the team during the process of installation and configuration of the entire system
- Makes software/system changes based on the provided requirements from the customer
- Monitor and ensure all services are properly running
- Investigate and troubleshoot the system's components

Successful candidature requirements:

You must be enrolled at a university or other higher education institution (Bachelor or Master Students);

Fluent in English is mandatory

Tech Skills:

Sufficient knowledge in:

- Linux
- Bash script
- Programming skills in any of the following languages (JavaScript, C++, Python)
- Troubleshooting skills (i.e. bug hunt, problem root cause drill-down)
- Software versioning systems such as Git
- REST, JSON, XML

Nice to have:

- Docker
- Elasticsearch
- Regex
- Kubernetes and ansible

Soft skills:

- Continuous learner
- Complex problem solver
- Team player
- Presentation skills
