

Web developer @ Intechopen

IntechOpen, the world's leading publisher of Open Access books, was built by scientists for scientists guided by the idea that scientific research should be easily accessible and free to use for everyone. Since 2004 we've published more than 5,400 Open Access books and 63,000 scientific papers from the fields of science, technology, and medicine, in collaboration with more than 128,000 scientists from around the world.

Today, based in London, we collaborate with scientists from the world's most prestigious universities such as Harvard, Stanford, MIT, and Oxford, and among our numerous authors are Nobel Prize winners Prof. Yoshinori Ohsumi, Prof. Harold W. Kroto, and Prof. Dr. Gérard Mourou.

The international scientific community has recognized the work of IntechOpen and as our portfolio continues to expand, we are looking for dedicated, serious, and ambitious individuals to join our team and help us continue to support scientific progress.

What we offer

This is an exciting opportunity for a Web Developer looking for the advancement in their professional career within an established global company. This role opens the opportunity for the hands-on professional experience, individual and group coaching and ongoing training programmes. We appreciate honest, hard-working, reliable people and we would gladly train an awesome person who fits our team culture.

If you're willing to learn, have a positive attitude and ready to go that extra mile as a part of our team, search no more.

Job description

Web Developer role is focused on development and implementation of new feature functions to support lifecycle of the authored scientific content (such as manuscripts) and maintenance and refactoring of already implemented user-facing functionality. Additionally, Web Developer role owns implementation of a separate marketing website project which is a single page front-end application fully decoupled from the back-end with API management components. It is a highly challenging and exciting opportunity for a Web Developer to extend professional skill set toward the full-stack development with key elements of SEO implementation.

What to expect:

- Writing clean, efficient code
- Create and maintain software documentation
- Integrate data from various back-end services and databases
- Implementing contingency plans in case the website goes down
- Stay plugged into emerging technologies/industry trends and apply them into operations and activities
- Internal service desk tasks
- Communicate professionally with a diverse group stakeholders on topics related to own tasks

Qualifications:

- BSc or MSc level in Computer science or similar
- Graduate or 1-2 years' experience
- Solid knowledge of **PHP, Maria DB/MySQL, Vue.js**
- Experience with **MVC Framework (Zend / Symfony), Node.js, GraphQL, SCSS and git** will be considered as a advantage
- A solid understanding of how web applications work including security, session management, and best development practices
- Curious, proactive and eager to learn new technologies
- Fluent in English, both spoken and written
- Enjoying team work and interaction with different stakeholders

If you think you might be a **great** match for our company, send your CV in English to jobs@intechopen.com and state **job opening in subject line**.
